

Souad Al-Rawi

Frontend Developer | React, JavaScript, TypeScript-learning & Accessible UI

Halmstad, Sweden | 0761-80 13 23 | suaadalrawi@yahoo.com | LinkedIn: linkedin.com/in/souad-al-rawi-410a53336 | GitHub: github.com/Souad81

PROFESSIONAL SUMMARY

Junior frontend/fullstack developer with hands-on experience from YH education, LIA and projects using React, React Native, JavaScript, HTML5, CSS3, REST APIs, C#/.NET and SQL. Built accessible, user-friendly interfaces from Figma/user needs to working features, including digital care flows for older users. Interested in modern e-commerce, reusable components, design systems, TypeScript and clean frontend delivery.

TECHNICAL SKILLS

Core frontend: React, React Native, JavaScript ES6+, HTML5, CSS3, responsive web, DOM manipulation, async operations

Learning / improving: TypeScript, state management, reusable component libraries, design systems, e-commerce storefront patterns

Build & package tools: Vite, npm, Node.js basics, Git, GitHub, VS Code, Visual Studio

UI / UX collaboration: Figma-to-code, accessible interfaces, WCAG mindset, reusable UI components, responsive layouts

Backend & data: C#, .NET, ASP.NET MVC, REST API integration, SQL Server, Entity Framework

Ways of working: Agile teamwork, testing, troubleshooting, code improvement, documentation, AI-assisted development

EXPERIENCE

Solvedit AB | Web Developer Intern (LIA) | Göteborg, Sweden | Oct 2025 - May 2026

- Developed frontend and fullstack-connected features for a React Native + .NET digital care application for older adults.
- Turned user needs and Figma ideas into accessible flows: calendar views, event creation, medication information, health parameters and reminders.
- Integrated frontend features with REST APIs, SQL/database-connected functionality and backend logic; tested, debugged and improved user flows.
- Collaborated in a small agile team and used AI tools responsibly for problem solving, code improvement, testing ideas and documentation.

Computer Science Institute | Computer Teacher | Baghdad, Iraq | 2004 - 2006

- Taught computer skills, explained technical concepts clearly and supported students with different knowledge levels.

EDUCATION

Web Developer - EC Yrkeshögskola | 2024 - 2026

Focus: JavaScript, React, React Native, C#, .NET, ASP.NET MVC, SQL Server, Entity Framework, REST API, Azure basics, Git.

Business Administration - Al-Turath University College | 1999 - 2004

SELECTED PROJECTS

Digital Visits for Older Adults | React Native, JavaScript, .NET, REST API, SQL Server, Figma

- Built accessible mobile UI flows for elderly care, including calendar, medication and health reminder functionality.

Portfolio Website | React, Vite, JavaScript, HTML, CSS

- Created a responsive personal portfolio with project sections, navigation, reusable layout components and clean UI structure.

Project Portal / Backoffice | React, JavaScript, .NET, SQL, REST API

- Developed CRUD-oriented UI and API-connected views with focus on structure, forms, troubleshooting and responsive design.

LANGUAGES

Arabic - native | Swedish - good professional working proficiency | English - good professional working proficiency
